
◆ Announces Launch of New global Tech Startup
and Open innovation event in Japan. ◆

TOKYO, Sep 2, 2016

NANO Opt Media, Inc, the Japanese leading technology event organizer, is please to introduce the new event "FiSH" (Fukuoka International Startup hub) in Jan.31-Feb 1 in Fukuoka International Congress Center, Japan. This will be the global face to face market place where enterprises, startups, media, university students and investors get together and accelerated connecting innovative technology to business.

FiSH will be produced with special support of Fukuoka City where is the the No.1 Startup rate in Japanese metropolis two years in a row. Also, Fukuoka City is the designated national strategic zone initiatives focus on startup by Japanese government. There are several preferential treatments not only for Japanese entrepreneurs but also international entrepreneurs.

☆ said CEO of NANO OPT Media, Hiroshi Fujiwara.

Japan accomplished rapid development as a major economic power of the third place (the Asian second place) of the world in the 20th century, but enter the period of maturity and approaches the turning point to take further development of the world economy. Nowadays creation of the entrepreneurship type economy model becomes the urgent theme in the 21st century to carry one end of new world economy development. Therefore this FiSH is convinced that it is a chance to create the new Japanese society where world entrepreneurs can play an active part.

☆ said producer of FiSH Yasuaki Oshima.

There are many events in Japan but those are mostly in Japanese only or with little bit English. English will be the main language of FiSH since we would like to aim to attract exhibitors and attendees globally. Also there are many startup events in Japan but those are most likely small and closed in domestic. In this internet economy, the business opportunities are globally open so we strongly believe FiSH will be the startup and open innovation hub from/into Japan.

The sponsorship and exhibit program is now open. For more information, please visit: <http://www.f2ff.jp/fish/>
